ARCHITECTURE DEPARTMENT

Mission
Wentworth Architecture transforms students with diverse backgrounds into innovative design thinkers and leaders in the field of architecture. They develop creative confidence, technical knowledge, professional skills, and expanded perspectives through integrated and applied learning experiences, including international travel studies and co-op employment. The studio-based program centers on making as a form of thinking. Students engage locally and globally, explore advanced technologies, team within and across disciplines, and learn to design sustainably. Wentworth Architecture students graduate with passion and insight, ready to contribute to society through the built environment.
