Dobbs Hall Room 144
(617) 989-4205

Vision

To be the school of choice for an inclusive global community that provides a formative and engaging learning experience in computing, data science, and mathematics.

Mission

The School of Computing and Data Science provides computing, data science, and mathematics knowledge and experience to the University and the community. We equip our graduates with the tools to lead and shape a technological society in a competitive global environment.
